

Artifact Analysis and Laboratory Methods in Archaeology

Anthropology 315: Spring 2021

This unique, problem-based course provides hands-on training in archaeological methods for determining the composition, age, manufacture, and use of different prehistoric and historic artifact types. Students will also learn techniques for the reconstruction of past natural environments from geologic and ecofact assemblages. (4 Hours Credit)

Tuesdays and Thursdays 3:30-4:45pm
Thursdays 5:00-5:50pm
